Introducing
100xEngineers
GenAI Job Board

The screenshot shows a dark-themed web browser window displaying the 'Job Board' section of the 100xEngineers website. The page features the '100x' logo and the text 'CURATED GENERATIVE AI JOB BOARD'. Below this, there's a large orange curly brace icon followed by the heading 'Job Board'. A contact email address, 'placements@100xengineers.com', is provided for issues and inquiries. Two job listings are shown: 'AI Generalist Role with Nikhil Kamath' and 'GenAI role at invest4edu'. Each listing includes a small profile picture, a job title, a brief description, and an 'Open' button. The footer contains category tags: 'AI', 'Tech', 'Finance' for the first listing, and 'AI', 'Education', 'EdTech' for the second.

How Do I Apply?

Simple, Fast & Efficient Application Process

Portfolio template tips and guidance

Try making custom portfolio for each requirement focusing
on the use case for the company.

Rules of thumb

Follow these to maximise your chances to get hired

- **Don't mass apply**, do your research about the company first and see if you'd be a good fit
- Make sure you apply to roles that fit well with your **skillset and interests**
- Highlight your **social presence**
- Attach a **personalised loom video**

Do's

- Complete and get all projects approved for placement eligibility.
- Ensure your resume, portfolio, and Loom video are approved, and fill out the placement form.
- Research the company well before applying & interview to increase your chances

Don'ts

- Missing more than one interview without a reason leads to penalty.
- Always let the 100xEngineers team handle negotiations.
- Share job opportunities through 100xEngineers only; direct referrals may result in penalties.

Markets requirements and analysis of top tools/ skills for each role

Markets requirements

Longform Content Writer

Key Skills: Writing engaging technical content, research skills.

Top Tools: Grammarly, Notion, AI writing assistants like Jasper

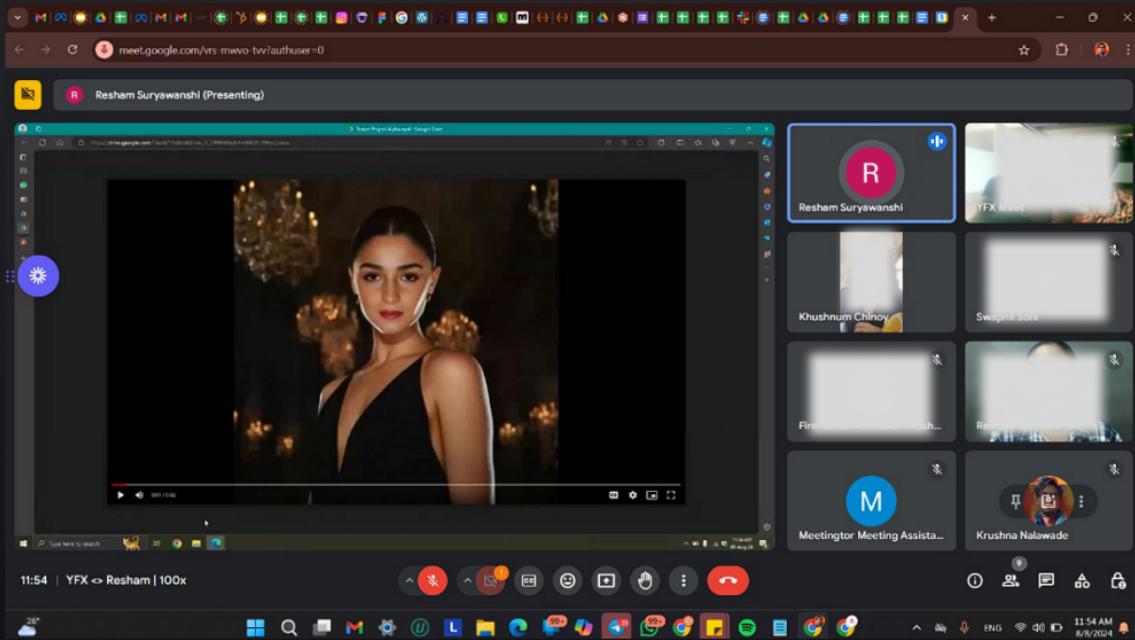

Case Study 1

YRF: Resham
Role: AI Engineer

One of the major reason why she got selected other than her technical skills was, her unique approach of presenting things to YRF.

She got shortlisted and within three hours she had an interview with the Studio head of YFX, in that time reshama created an AI trailer of Alia bhat's new movie which was extremely good.

She is the first hire in her department.

Case Study 2

Yeshwant: House of models.

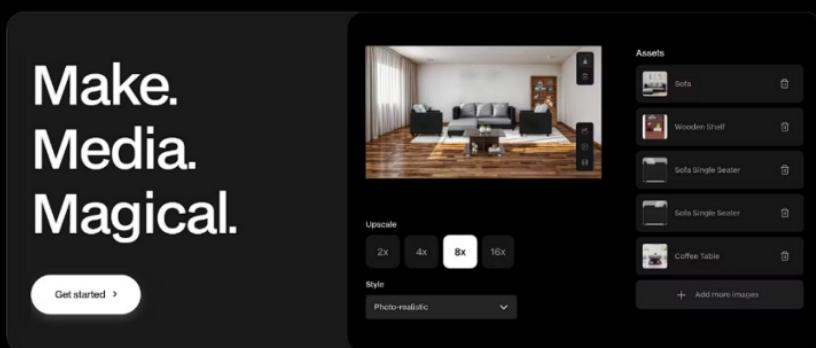

Comfy developer: Manages end to end e-com projects at HoM

Extremely good with skills, but portfolio. In place, very carefully drafted and strong. Made sample models immediately.

Yeshwant's Portfolio

Sentient Product Experiment :

Case Study 3

Rahul: NKSqr

1. Based on the requirement he gave us a complete doc to sent to nikhil's team how he can help those guys
2. The deck was extremely good and had thorough research
3. He got shortlisted
4. When he had interview with Nikhil he started with an AI avatar and an Deepfake model, helping him make the WOW impression in nikhil's mind and SHOWING that he is an expert.

Compensation Range

8 to 10 LPA for Junior Engineers

10 to 12 LPA for Mid Engineers

12-20 and up for Senior Engineers
